(IP) Manager

Chinako's IP Life

Art 9: 'The Laws of Nature'  
must be utilized. IP Green  
will finally appear!

Produced by Shouhama High  
School IP Club (applying)

Sorry.  
I'm kidding.  
I'll remove  
your LLCC.

Wait a bit!

C'mon!  
Tsukuru-chan.

I taught you a feeling  
of wearing "LLCC".  
So, please remove  
my LLCC.

So, I want to  
make sure who  
will rescue Chinako.

Let us wait  
while talking about  
the laws of nature.

Alright Beret!  
Let us wait for  
a while until  
IP Green comes.

The attitude of trying  
to confirm everything is  
precious for an engineer.

Uh huh.

The "utilizing" of  
the laws of nature is  
to exert some technical  
effect using this law.

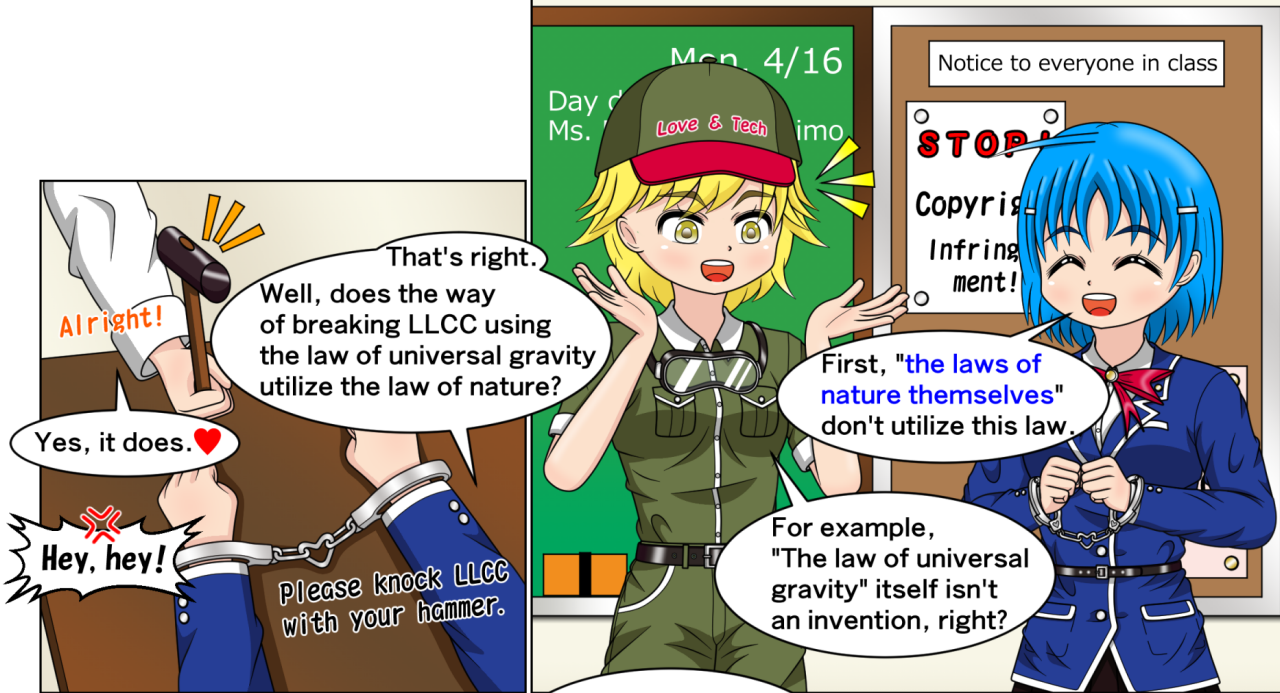

Then, let me give  
three examples that  
don't utilize this law.

Thanks,  
IP Green!!

I come to  
help you,  
IP Blue!

In Japanese TV programs where  
heroes are transformed and active,  
stories in which companions  
rescue heroine caught by enemies  
are common stories. **Ahem!**

Hey Misube-chan.  
Who is IP Green?

Alright!

That's right. Well, does the way of breaking LLCC using the law of universal gravity utilize the law of nature?

Yes, it does. ♥

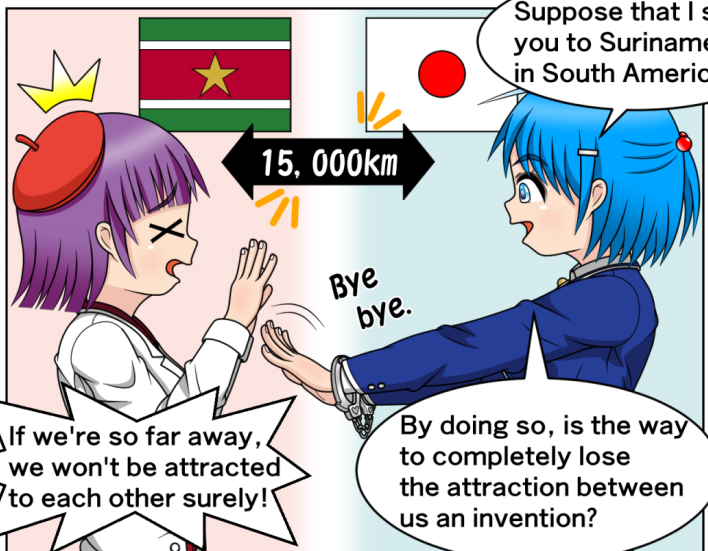

Hey, hey!

Please knock LLCC with your hammer.

First, "the laws of nature themselves" don't utilize this law.

For example, "The law of universal gravity" itself isn't an invention, right?

Notice to everyone in class  
**STOP!**  
Copyright Infringement!

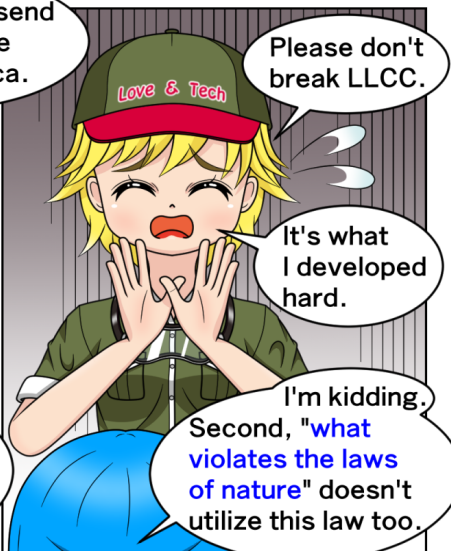

If we're so far away, we won't be attracted to each other surely!

By doing so, is the way to completely lose the attraction between us an invention?

Suppose that I send you to Suriname in South America.

15,000km

Bye bye.

Please don't break LLCC.

It's what I developed hard.

I'm kidding. Second, "what violates the laws of nature" doesn't utilize this law too.

The way mentioned above violates the law of universal gravity that "all objects are pulling each other".

Thus, that way isn't an invention. Of course, our minds already aren't attracted at all. ★

Gosh!?

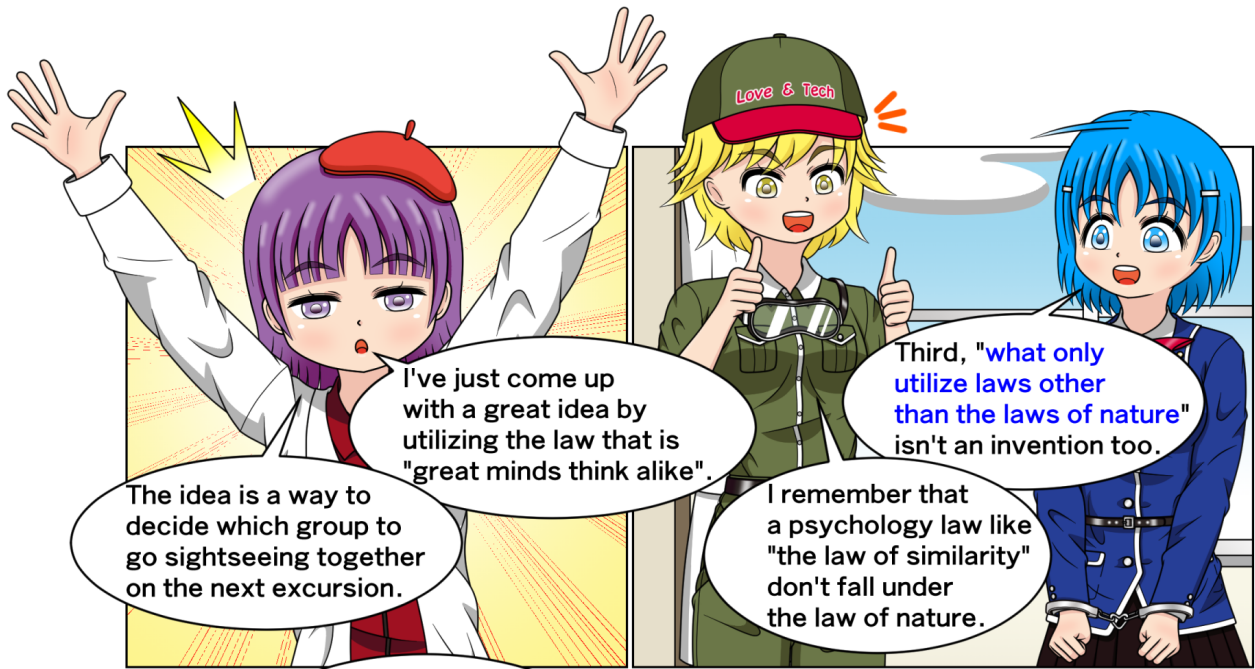

Even in such a case, the attraction between you will become very small, but not completely lost.

Don't worry!

Whew!

I was relieved. Me and she are attracted to one another no matter how far away we go.

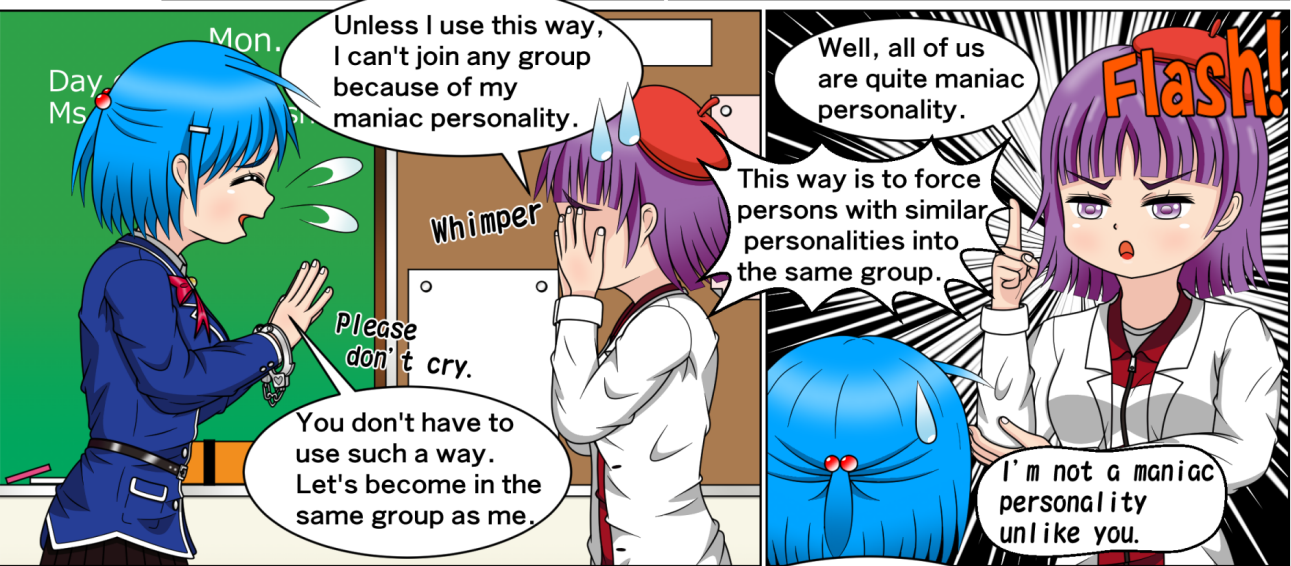

The idea is a way to decide which group to go sightseeing together on the next excursion.

I've just come up with a great idea by utilizing the law that is "great minds think alike".

I remember that a psychology law like "the law of similarity" don't fall under the law of nature.

Third, "what only utilize laws other than the laws of nature" isn't an invention too.

Day Ms  
Mon.  
Please don't cry.  
You don't have to use such a way. Let's become in the same group as me.

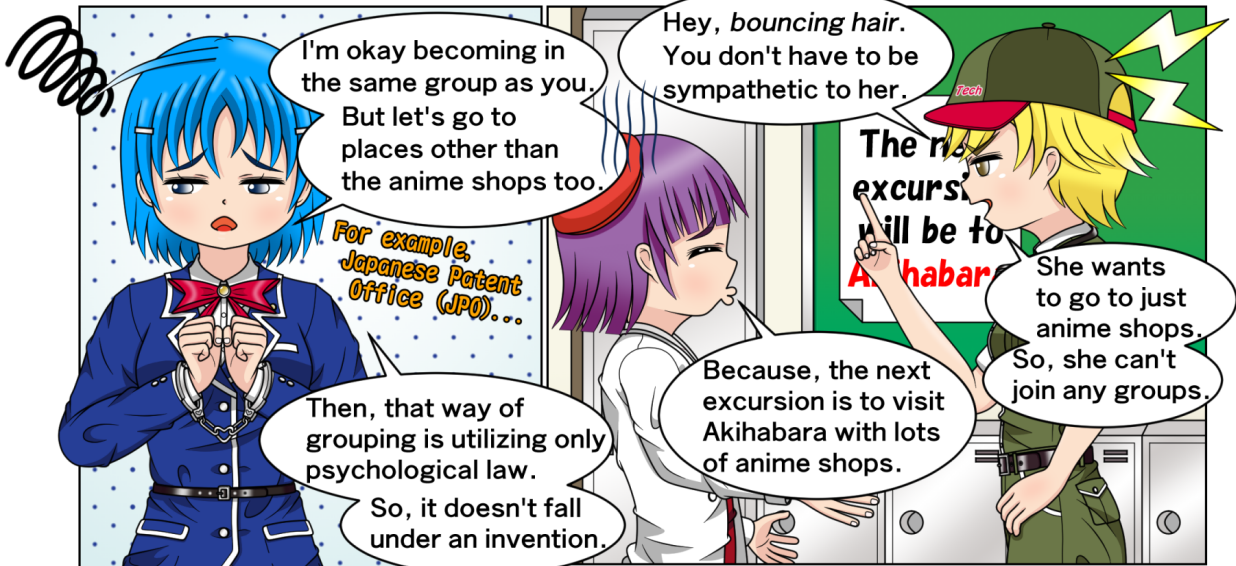

Unless I use this way, I can't join any group because of my maniac personality.

Whimper

Well, all of us are quite maniac personality.

This way is to force persons with similar personalities into the same group.

Flash!  
I'm not a maniac personality unlike you.

I'm okay becoming in the same group as you. But let's go to places other than the anime shops too.  
For example, Japanese Patent Office (JPO)...

Then, that way of grouping is utilizing only psychological law. So, it doesn't fall under an invention.

Hey, bouncing hair. You don't have to be sympathetic to her.

Because, the next excursion is to visit Akihabara with lots of anime shops.

The next excursion will be to Akihabara.  
She wants to go to just anime shops. So, she can't join any groups.

Mon. 4/16

If LLCC utilizes the laws of nature as a result, it's an invention.

So, you don't need completely understand the laws of nature. Furthermore, it doesn't matter if you misunderstand it.

Still, can you say that LLCC utilizes the laws of nature?

By the way, I don't completely understand what kind of laws of nature that LLCC utilizes.

However, if you don't understand an invention enough, you may not be able to properly prepare the documents to be submitted to JPO.

That's certainly a concern.

OK. I'll understand the mechanism of LLCC properly.

That's right. But I haven't misunderstood so badly.

That hat suits you.

Thanks.

For example, even if you misunderstand LLCC as a witch's deed, LLCC falls under an invention.

There you are. Ms. Nonodate!

Bang!!

Wow! Ms. Maisono.

IP Green has come. ♥

Continue to Art. 10

© 2019 Kiyomune Nakagawa

Well, we waited for a while, but no one came here.

TAP TAP TAP

Sh!

Footsteps are approaching. Who do you think come to rescue IP Blue?
